

QUICK GUIDE TO SOM PROMOTIONS BASED ON THE 2017 GUIDELINES

Professor with Tenure

Candidates for the rank of Professor with tenure must hold a doctoral degree and have significant accomplishments in all three mission areas, including achieving a national/international leadership role in scholarship, teaching or professional service. While tenure decisions usually will occur at the level of Associate Professor, promotion to Professor can be coupled with a grant of tenure. A tenure decision must be made and take effect by the end of the 11th year on the tenure clock. If a tenure decision is made earlier and is unfavorable, a candidate may be reconsidered in subsequent years provided he/she still falls within the 11-year tenure clock. At the time of appointment or promotion, the candidate, together with the Department Chair, must identify the area of distinction (scholarship, teaching, or professional service) that best matches his/her accomplishments.

Levels of accomplishment and their relative weight are summarized in the figure below. (Note: Because scholarship by nature is public, scholarship benchmarks are not divided into national/international or institutional/regional):

Area of Distinction: Scholarship

Candidates whose focus is scholarship must meet the criteria set forth in **Table A**. To determine if these criteria have been achieved, they should then compare their accomplishments with the appropriate benchmarks from Tables 1-5 in the promotions guidelines (**excerpted below as tables B-F**). Candidates will be evaluated on quantity, quality, and impact of their accomplishments. It is not necessary to achieve every benchmark in a given category, but a sustained pattern of accomplishments, including multiple items at the applicable or greater benchmark level, is expected. **Please refer to Tables 1-5 in the official guidelines for accomplishments not listed here, or for the equivalent benchmarks at the institutional/regional or national/international levels.**
