HIGH BLOOD PRESSURE?

RESEARCH STUDY
This study will test the ways blood pressure medications may affect the brain and thinking abilities.

PARTICIPANTS WILL RECEIVE:

- Between 5-10 visits to Emory over a one-year period
- Testing of memory and thinking abilities.
- Brain scan, blood pressure readings and blood tests
- One-year supply of blood pressure medications
- Volunteers will be compensated for time and travel

VOLUNTEERS
55 years or older
Looking for:
- Individuals with high blood pressure with or without medication
