Ramzi Mulki

**What is your hometown?**
I was born and raised in Amman, Jordan.

**Where did you attend medical school and residency?**
I attended medical school at the University of Cairo in Egypt and did my internal medicine training at Albert Einstein Medical Center in Philadelphia, PA.

**What are your career goals?**
My future career and research goals include advanced endoscopy, pancreatico-biliary disorders, and bariatrics.

**What were you looking for in a gastroenterology (GI) fellowship program?**
When I applied for fellowship I was looking for a training program that had rigorous clinical training, would foster my career goals and set me on to a path in academia. The Division of Digestive Diseases at Emory fulfilled all what I was looking for and much more.

**What are the strengths of Emory’s GI fellowship program?**
The people – friendly, approachable, and dedicated. The opportunity to train at different sites around Atlanta (Grady, Emory University Hospital, St. Josephs Hospital, and the VA) gives us a rich and diverse clinical experience. The opportunities for research in various areas of GI such as motility, inflammatory bowel disease, liver transplant, and pancreatico-biliary diseases. All of these wrapped in a collegial family-friendly environment that makes training at Emory great!

**What are you enjoying most about Emory’s GI fellowship program?**
The work environment, breadth of training, and the opportunities for research.

**What advice do you have for future fellows?**
Get ready for a wonderful experience! Stay flexible, work hard, find a mentor, have a plan, and have fun!

**What is the best part about living in Atlanta?**
Atlanta is a large, diverse, metropolitan city with basically everything you are looking for!
