EMORY UNIVERSITY SCHOOL OF MEDICINE
SLEEP MEDICINE
FELLOWSHIP TRAINING PROGRAM

CLINICAL TRAINING REQUIREMENTS

- Each fellow is expected to evaluate at least **100 new patients** in the sleep medicine outpatient practice.

- Each fellow is expected to provide continuous care to at least **150 follow-up patients** in the sleep medicine outpatient practice.

- Each fellow is expected to evaluate at least **40 new patients in the pediatric** and **40 new patients in the adult** sleep medicine outpatient practice.

- Each fellow is expected to provide continuous care to at least **40 follow-up patients in the pediatric** sleep medicine outpatient practice and **40 follow-up patients in the adult** sleep medicine outpatient practice.

- Each fellow is expected to evaluate a minimum of **5 inpatients** with sleep medicine complaints from representative demographic groups.

- Each fellow is expected to review and interpret **200 polysomnographic studies**, of which a minimum of **40 need to be pediatric-based and 40 adult patients**.

- Each fellow is expected to review and interpret **25 Multiple Sleep Latency Tests** (MSLTs) and/or Maintenance of Wakefulness Tests (MWTs).

- Each fellow is expected to score 25 polysomnograms, at least 10 of which must be in children.

- Each fellow is expected to score and interpret **50 home sleep studies**.

- Each fellow is expected to do a minimum of **one interscorer reliability session for each rotation** (total = 6; 2 EP12; 2 VA; 2 CHOA). This can count towards scoring totals.
• Each fellow will keep logs of his/her clinical activities that documents information regarding all patients seen and all studies interpreted or scored, including: the dates and attending physicians of clinics attended, the patients’ diagnoses, the number of PSGs interpreted, the number of PSGs scored and the number MSLTs/MWTs interpreted. These logs will be entered into the New Innovations system electronically by the fellow. This log will be used to document that the fellow has fulfilled the clinical requirements set by the ACGME.
